A liquid container for an inkjet recording apparatus, capable of containing liquid to be used by an inkjet head, wherein said liquid container is detachably mountable to a holder having the inkjet head and an ink supply tube for directing liquid to the ink jet head, said liquid container comprising:

a main body, provided with an ink accommodating member, for containing a liquid;

a supply port for supplying the liquid to the recording head, said supply port being disposed in a side which faces said ink supply tube when said liquid container is mounted in the holder, wherein said ink accommodating member faces said ink supply port;

a first engaging portion, provided on a first side of said main body, adapted to engage with a first locking portion of the holder; and

an elastic supporting member having a second engaging portion at an outside

**Claim 210:** The claim has been rewritten as follows:

---

210. A liquid container for an inkjet recording apparatus, capable of containing liquid to be used by an ink jet head, wherein said liquid container is detachably mountable to a holder having an ink supply tube constituting a beginning end of a path for directing the liquid to the ink jet head, said liquid container comprising:

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

**Referring to claim 154:** The most pertinent prior art Hirabayashi et al. (US 5671000) and Kaisha et al. (EP 0585615 A2) fail to disclose an elastic supporting member having a second engaging portion at an outside thereof adjacent of a second side of said main body opposite of the first side adapted to engage with a second locking portion of the holder, wherein said supply port is disposed between said first engaging portion and said second engaging portion. Therefore, the claimed invention is not disclosed by the cited prior art.

**Referring to claim 210:** The most pertinent prior art Hirabayashi et al. (US 5671000) and Kaisha et al. (EP 0585615 A2) fail to disclose a supporting member resiliently supported by said main body and being extended in front of a second side opposite said first side and having a second engaging portion at an outside thereof facing away from said second side of said main body and capable of moving away from and towards said second side, which said second engaging portion is adapted to engage with a second locking portion of the holder. Therefore, the claimed invention is not disclosed by the cited prior art.

Claims 155-156, 158-176, 180, 207-209, and 211-215 are allowed because they depend directly/indirectly on claim 154 or 210.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
